

M. Afiif Imanto

Software Engineer | Full-Stack Developer

Greater Jakarta Area, Indonesia • +62 853-6878-1383 • imantoafiif@gmail.com • linkedin.com/in/afiif-imanto-a46a7314b

PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years in software development, delivering user-centric web and mobile applications end to end — from React, Vue, and Next.js frontends to Node.js/Express, Django, and PHP APIs backed by PostgreSQL. Google Cloud–certified (Associate Cloud Engineer), with a track record of leading small teams, owning full-stack architecture, and shipping enterprise solutions under tight deadlines for state-owned enterprises and international clients. Focused on maintainable, reusable component systems, clean REST API design, and seamless frontend–backend integration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, PHP, HTML5, CSS3

Frontend & Mobile: React.js, Next.js, Nuxt.js, Vue.js, React Native, Flutter, PWA, Capacitor, Tailwind CSS, Bootstrap, SASS/LESS

Backend & APIs: Django, Node.js (Express.js), PHP Slim, REST API design & development

Databases: PostgreSQL, MySQL, relational data modeling

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git (Bitbucket/GitHub), Vite, npm/Yarn

AI Integration: Google Gemini (multimodal vision & OCR), AI-powered fraud & tamper detection

AI-Assisted Development: Cursor, Claude Code

Tools & Practices: Postman, DBeaver, Agile/Scrum, Figma-to-code (UI slicing), responsive & SEO-optimized development

PROFESSIONAL EXPERIENCE

Software Engineer May 2025 – Present

Commsult Technology Indonesia

- Develop end-to-end solutions for the company's clients, matching the tech stack to each project's requirements — primarily React.js, Django, PostgreSQL, and MySQL, deployed on Google Cloud infrastructure.
- Own delivery across frontend, backend, and system design, building reusable architectures that scale across multiple client applications.
- Leverage AI-assisted development tools to accelerate day-to-day engineering.

Senior Web Developer Jun 2024 – May 2025

Commsult Technology Indonesia

- Led a small web development team, partnering with marketing and design to deliver SEO-optimized corporate websites and marketing solutions.
- Spearheaded a pixel-perfect development standard, overlaying live builds against Figma mockups with comparison tooling to eliminate visual drift and reproduce designs down to the exact pixel.
- Owned key technical decisions across the company's multi-domain web presence to ensure a smooth, seamless user experience.

Frontend Developer Apr 2019 – Apr 2024

Telkomsigma

- Delivered, maintained, and customized frontend and backend applications for enterprise customers, primarily Indonesian state-owned companies.
- Designed and consumed REST APIs, translated Figma designs into production UIs, and collaborated in Agile/Scrum teams across 10+ client projects.

System Analyst Mar 2018 – Dec 2018

Artapala Telekomindo

- Conducted social media intelligence research using a specialized intelligence platform.
- Provided technical support and delivered product training to customers.

Web DeveloperJan 2018 – Mar 2018

Alcatel-Lucent Enterprise

- Developed the frontend of an e-commerce web application with integrated social media, powered by Alcatel's Rainbow communication platform.

Android Developer (Internship)2016

Telkomsel

- Built a native Android e-voting application using the Android SDK.

KEY PROJECTS

Amantara – Consumer Experience Ecosystems (PIK 2, Agung Sedayu Group)Apr 2026 – Present

Commsult Technology Indonesia · *Django, Flutter, PWA, PostgreSQL/MySQL, Google Cloud*

- Contributing to a large-scale, multi-application consumer platform for Amantara, a managed property mega-development within PIK 2 (Pantai Indah Kapuk 2) under a subsidiary of Agung Sedayu Group.
- Built the consumer app backend in Django, exposing APIs consumed across the platform's multiple applications.
- Designed and built the backend for an AI-powered receipt-to-rewards engine that converts users' proof-of-purchase into redeemable loyalty points (spendable on event tickets, gift codes, and more), integrating Gemini 3.5 Flash multimodal AI to OCR transaction receipts and automatically extract billed totals.
- Engineered an AI-driven anti-fraud layer using Gemini 3.5 Flash to inspect image metadata and detect tampered or AI-generated receipts before points are awarded, safeguarding the rewards economy against abuse.
- Engineered an immersive 3D interactive map of the PIK 2 area in Flutter, powered by Thermion (built on Google's Filament physically-based rendering engine) to deliver native, GPU-accelerated 3D rendering with real-time, gesture-based navigation.
- Developed a companion PWA enabling tenants to redeem member vouchers.
- Helped design the overall system architecture spanning the platform's integrated applications, leveraging AI-assisted tooling to accelerate delivery.

Bintang Agency – KOL & Marketing Campaign PlatformSep 2025 – Dec 2025

Commsult Technology Indonesia · *React.js, CAFE (Java)* · *kranjang.co.id*

- Solo-led frontend development of a large KOL and marketing campaign platform in React.js, owning architecture and feature delivery within a compressed ~2-month timeline.
- Contributed to the backend using CAFE (Commsult Application Framework Engine), the company's proprietary Java-based application framework.
- Implemented complex campaign workflows, KOL management, and data-driven dashboards using reusable, scalable UI components.
- Partnered with QA on extensive manual testing and iterative stabilization to reach production readiness, and translated stakeholder requirements into technical solutions.

Nex Entertainment – KOL & Marketing Campaign PlatformMay 2025 – Sep 2025

Commsult Technology Indonesia · *React.js* · *nexentertainment.live*

- Developed the frontend of a KOL and marketing campaign management platform in React.js over a 6-month cycle, prioritizing maintainable architecture and long-term scalability.
- Designed the core frontend architecture, reusable component systems, and shared utilities later reused across subsequent projects.
- Collaborated with a frontend partner on feature planning and code review, delivering a stable, well-tested release ahead of schedule.

Ontego Cockpit (Ontego SAP)Aug 2024 – Present

Commsult Technology Indonesia · *React.js, Express.js*

- Develop full-stack features for the Ontego SAP cockpit, designing and building REST APIs in Express.js and integrating them on the React frontend.
- Sliced Figma designs into production UI and contributed in daily Agile standups.

Commsult Corporate Websites2024 – Present

Commsult Technology Indonesia · *commsult.id, commsult.de, ontego.de*

- Led a small team to develop, maintain, and customize the company's multi-domain corporate websites.

- Owned key technical decisions to ensure a smooth, seamless user experience and delivered pixel-accurate Figma implementations.

Dexter – Digital Signature, Stamping & E-Meterai App Mar 2023 – Apr 2024

Telkomsigma · Django, Figma · powered by Peruri

- Developed and maintained Dexter, a digital signature, stamping, and electronic stamp-duty (e-meterai) application powered by Peruri systems.
- Designed and built backend APIs in Django, consumed APIs on the frontend, and delivered UI from Figma.

Integrated Talent Management System (ITMS) – PNM May 2022 – Dec 2022

Telkomsigma · Telkom's ITMS platform

- Customized and maintained the ITMS platform, collaborating with backend developers for seamless data integration.

Corporate Learning Management System – Pelindo 3 Mar 2021 – Aug 2021

Telkomsigma

- Built and customized an LMS aligned to client business processes, translating Figma designs into the application UI.

Employee Self-Service App (Larisa) – Pegadaian Jul 2020 – Dec 2020

Telkomsigma

- Developed Larisa, an employee self-service app and its CMS, integrating APIs and collaborating with backend developers for reliable data flow.

Integrated Talent Management System (ITMS) – Nindya Karya Nov 2019 – Apr 2020

Telkomsigma · PHP Slim

- Delivered ITMS features and designed/developed supporting APIs in PHP Slim, ensuring seamless frontend–backend data communication.

Diarium CMS & Face Recognition API – Telkom Indonesia Jul 2019 – Dec 2020

Telkomsigma · PHP Slim, Python/Django

- Built and maintained the CMS for Diarium, Telkom's internal employee self-service app, developing supporting APIs in PHP Slim.
- Developed a facial recognition API in Python/Django and designed the underlying facial-information database.

ITMS & Human Capital Information System – Pelindo 3 / Telkom May 2019 – Aug 2019

Telkomsigma

- Customized ITMS to client business processes, ensuring smooth data flow and reliable business-process execution.
- Developed and debugged the frontend of an internal Human Capital Information System as part of a team.

Paytren E-Commerce Social Market App Jan 2018 – Mar 2018

Alcatel-Lucent Enterprise · Rainbow platform

- Helped build, maintain, and debug an e-commerce web application with integrated social media on the Rainbow communication platform.

EDUCATION

Bachelor of Informatics Engineering (Computer Science) 2013 – 2017

Sriwijaya University · Cum Laude

Senior High School (Science Programme) 2010 – 2013

SMA Negeri 1 Palembang

CERTIFICATIONS

Google Associate Cloud Engineer Jul 2026 – Jul 2029

Google Cloud
